Java | Spring Boot | Spring |

Data Structure & Algorithm |

Hibernate | MySQL | HTML5 | CSS |

JavaScript

SOFT SKILLS

Adaptability | Teamwork |

Problem Solving | Time Management

CERTIFICATIONS

- Java Basic Certificate by HackerRank

SAGAR BHADRAWLE

Java Backend Developer

PROFESSIONAL SUMMARY

Dedicated Java backend developer with expertise in Java, Spring Boot, Hibernate, and MySQL. Collaborative problem-solver and effective communicator. Strong proficiency in developing efficient and reliable server-side applications. Proven ability to optimize code, queries, and server configurations for performance, scalability, and security. Stay updated with emerging technologies and industry best practices. Strong teamwork skills to collaborate with cross-functional teams and improve development processes.

PROJECTS

1. Sanjeevani | 🌐 | 🇮🇳

Java | Hibernate | MySql | SpringBoot | Spring

- Developed a scheduling REST API using *Java*, *Hibernate*, and *SpringBoot*.
- Implemented authentication and registration features to enhance user convenience and security.
- Designed and implemented relational mapping, service layer, and controller layer.

2. ScheduLink | 🌐 | 🇮🇳

Java | MySQL | Hibernate

- Developed a console-based appointment scheduling system using Java, MySQL, and Hibernate.
- Implemented user registration and login functionality for both customers and service providers.
- Implemented features such as appointment booking, cancellation, and searching for service providers.

3. Aeropostale | 🌐 | 🇮🇳

Html | JavaScript | CSS

- Developed a high-performance backend system using Java and Spring framework to support e-commerce functionalities.
- Implemented RESTful APIs for seamless integration with frontend components and external systems.
- Optimized database queries and server configurations to ensure the scalability and performance of the system.

ACHIEVEMENTS

- Card of Appreciation,
